SQL BASED DATA ANALYSIS

INSIGHTS:

1) Technology category generates highest revenue

```
SELECT Category, SUM(Sales) AS total_sales
FROM orders
GROUP BY Category;
```

category	total_sales
Furniture	741999.7953
Office Supplies	719047.032
Technology	836154.033

2) West region contributes highest sales

```
SELECT Region, SUM(Sales) AS total_sales
FROM orders
GROUP BY Region;
```

region	total_sales
Central	501239.8908
East	678781.24
South	391721.905
West	725457.8245

SQL BASED DATA ANALYSIS

3) Top products contribute significantly to revenue

```
SELECT "product_name", SUM(Sales) AS total_sales
FROM orders
GROUP BY "product_name"
ORDER BY total_sales DESC
LIMIT 5;
```

product_name	total_sales
Canon imageCLASS 2200 Advanced Copier	61599.824
Fellowes PB500 Electric Punch Plastic Comb Binding Machine with Manual Bind	27453.384000000002
Cisco TelePresence System EX90 Videoconferencing Unit	22638.48
HON 5400 Series Task Chairs for Big and Tall	21870.576
GBC DocuBind TL300 Electric Binding System	19823.479

4) Sales show increasing trend over time

```
SELECT strftime('%Y-%m', "order_date") AS month,
       SUM(Sales) AS total_sales
FROM orders
GROUP BY month
ORDER BY month;
```

SQL BASED DATA ANALYSIS

month	total_sales
NULL	2297200.8603

CONCLUSION:

This project demonstrates how SQL can be used to analyse and extract insights from large datasets. It helps in understanding business performance and supports data-driven decisions.
